DOB: 24/05/2005

PROFILE

Third-year Computer Engineering student with a strong foundation in Java, Data Structures and Algorithms, and Object-Oriented Programming. Hands-on experience in writing and debugging code, building backend using Node.js Express.js and full-stack applications, and working with databases. Familiar with Git, GitHub, REST APIs, PostMan, MongoDB, MongoDB Atlas and MS SQL.

EDUCATION

Mukesh Patel School of Technology Management and Engineering NMIMS

Shirpur, Maharashtra
Sep. 2023 – Apr. 2027

- Bachelor of Technology, Computer Engineering
- CGPA: 3.52/4 or 8.8/10

Vivekanand vidhyalay khalane

Class X

Khalane, tal. Shindkeda. Dist. Dhule,
Maharashtra.
2020-2021

- Class X Percentage: 93.80%

S.s.v.p.s college Shindkheda

Class XII

Shindkheda. dist. Dhule, Maharashtra

- Class XII Percentage: 75.33%

2022-2023

PROJECTS

ResourceHub | Project link [github- ResourceHub](#) live project link- [ResourceHub](#)

MAY 2025

ResourceHub is a full-stack(MERN) academic resource management platform, similar to a digital library for university students. It enables users to browse, search, and contribute semester-wise notes, PYQs, PDFs, PPTs, and more, all organized by university, program, and subject. Features include interactive dashboards, real-time search, secure file uploads, and role-based access, providing a seamless and modern experience for both students and contributors.

Tech Stack:

- Frontend: React.js, CSS .
- Backend: Node.js, Express.js, MongoDB, Mongoose
- Cloud Storage: Cloudinary
- Other: Multer (file uploads), RESTful APIs

Personal Portfolio Website | Project Link- [Portfolio Website](#)

JULY 2025

- MERN stack

CCTV-Based Student attendance system | (Working) Project link- [cctv-based attendance system](#)

Automated CCTV-based attendance system: a Python Flask web app that detects faces from live/video feed, creates FaceNet embeddings, trains a classifier to recognize students, and records attendance in a SQLite DB with CSV export and a web UI for management.

Tech stack

- Language: Python 3.11
- Web: Flask, Jinja2 (HTML templates), Bootstrap (front-end styling in templates).
- Computer vision / ML:
 - Face detection & alignment: facenet-pytorch (MTCNN)
 - Feature extraction: facenet-pytorch
 - Classifier: scikit-learn (SVM)
 - Image handling: PIL / Pillow
- Data & persistence:
 - SQLite (local DB via sqlite3) for attendance and student records
 - CSV export (pandas).
- OpenCV (camera capture)

RFID-Based Student Attendance System | Arduino Uno , RFID Reader

NOV 2024

- Designed and implemented an automated attendance system using an RFID reader and Arduino Uno.
- Enabled efficient and accurate student attendance tracking, reducing manual effort and errors.

TECHNICAL SKILLS AND INTERESTS

- **Languages:** Java, C++ ,Python, HTML,CSS,JAVASCRIPT, SQL .
- **Backend :** Node.js,Express.js
- **Libraries and Frameworks:**
- **Operating Systems:**
 - Windows, Linux.
- **Software:** Visual Studio,Google Colab ,MS-SQL
- **Concepts:** Data Structures and Algorithms ,Object-Oriented Programming (OOP),Operating System, Database Management, Computer Networks.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Foundations Associate ([link ↗](#))

Valid: Aug 2025– Aug 2027
